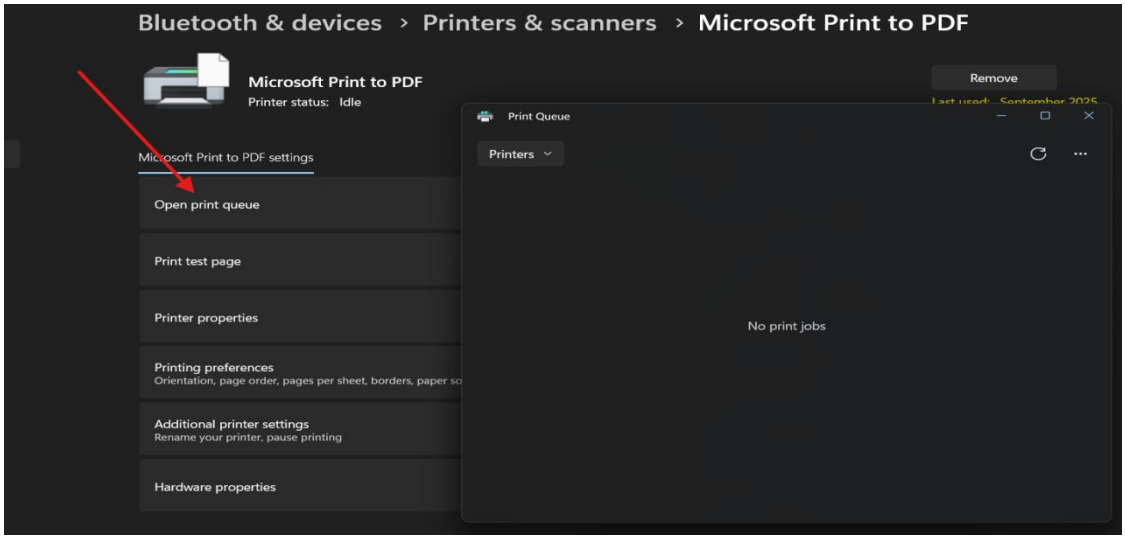
**Suraj Kshirsagar**

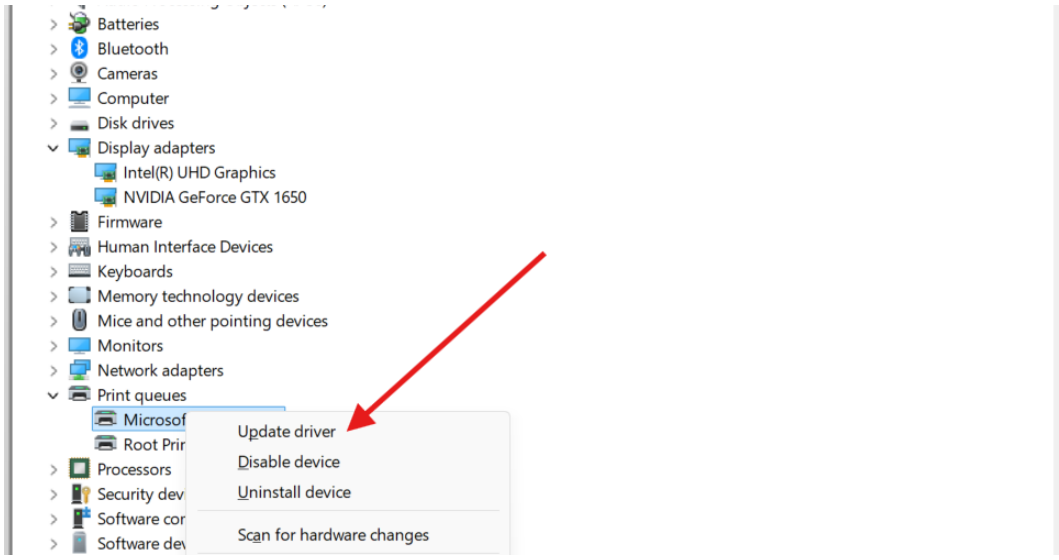
**Issue No 1**:- Unable to Print Word/PDF

**Solution:-**

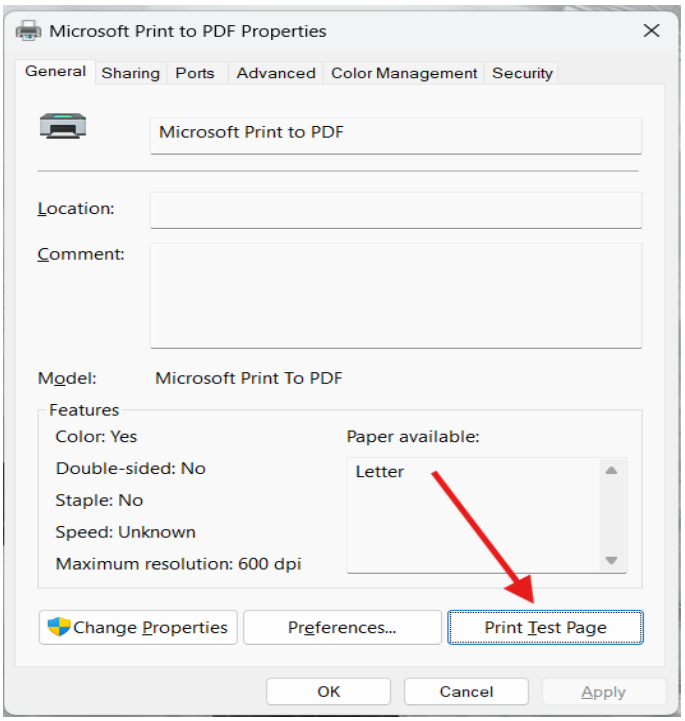
1. Ensure Printer in Powered on.
2. Verify the printer is connected properly to USB cable, Network.
3. Go to Control Panel --> Devices and Printer
   - Make Sure the Correct printer is set as Default Printer.
4. Open the Printer queue from Devices and Printer
   - If there are stuck jobs, select Cancel All Documents.
   - Try printing Again.

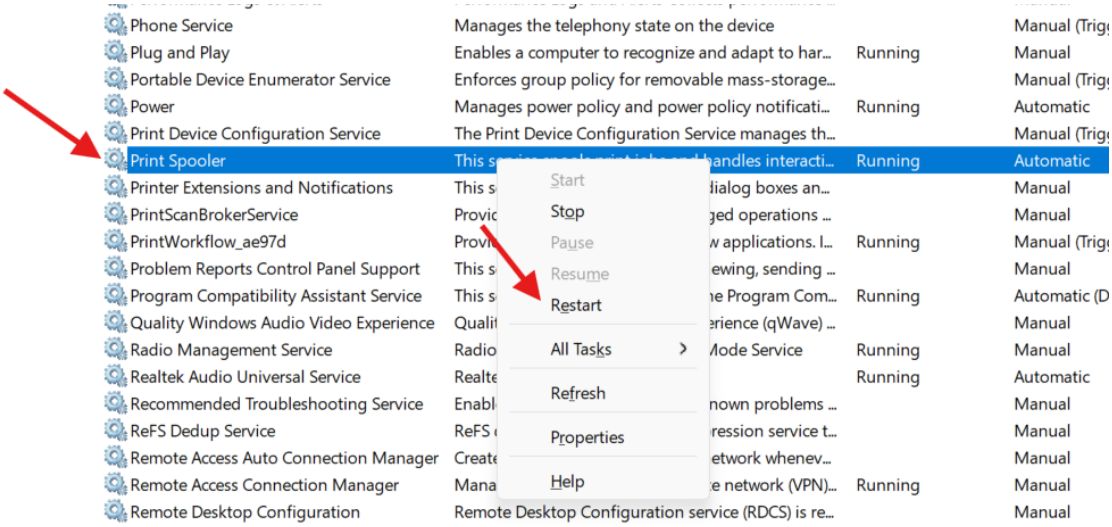


5. Confirm the printer driver is up to date
   Device Manager -> Print Queues -> Update Drivers



6. Go to Printer Properties → Print Test Page.
   - If the test page prints successfully, the issue is likely with the application or file.





7. Restart the Print Spooler service:
   - Open services.msc → Find Print Spooler → Restart.
   - Update or reinstall the PDF/Word application if the issue persists.
